Tektronix[®]

Arbitrary/Function Generator

AFG1000 Series Datasheet

The AFG1000 Series Arbitrary Function Generator provides a waveform generation tool with the best price performance ratio. It includes two models with dual channels, up to 60 MHz bandwidth and up to 10 V_{p-p} output amplitude. The four run modes, 50 built-in frequently-used waveforms and the built-in 200 MHz frequency counter cover most waveform generation needs in your experiment and test jobs. The 3.95-inch TFT LCD, short-cut buttons, USB interface and PC software provide the most intuitive ways to configure the instrument.

Key performance specifications

- Dual-channel, 25 MHz or 60 MHz sine waveforms, 12.5 MHz or 30 MHz square waveforms
- 14 bits, 125 MS/s or 300 MS/s arbitrary waveforms with 8 k points record length
- Amplitude 1 mV_{p-p} to 10 V_{p-p} into 50 Ω loads

Key features

- Continuous, sweeping, burst, and modulation modes (AM, FM, PM, ASK, FSK, PSK, PWM) covers most requirements for students and other users to get the experiments/test job done
- 64-MByte internal non-volatile memory for arbitrary waveform storage
- Built-in 200 MHz counter with 6-digit resolution offers an easy and precise way of frequency/period/pulse width/duty cycle measurement
- Standard USB host/device for memory expansion and remote control
- Free ArbExpress makes user defined waveforms editing extremely easy through an external USB memory stick

- Compatible with TekSmartLab™ for easy teaching and learning
- Standard 5-year warranty

Applications

- Electric and electronics experiments
- Communications experiments
- Sensor simulation
- Functional test

Performance and features

1 μ Hz to 25 MHz or 60 MHz sine waveform range, with 12-digit or 1 μ Hz resolution and a \pm 1 ppm drift high stability time base, provides great signal fidelity in the frequency domain. With 1 mV_{p-p} to 10 V_{p-p} output amplitude range, and 14-bit or 1 mV_{p-p} resolution over the whole frequency range, there is no need to compromise between output amplitude and frequency any more.

Four different run modes cover most use cases with a cost effective solution. 50 most-frequently used standard and arbitrary waveforms are built-in for easy access. Up to 1 M points arbitrary waveforms memory enables users to replicate real world signals captured with a Tektronix oscilloscope or defined with ArbExpress. The built-in 200 MHz and 6-digit resolution frequency counter is an easy and precise way to measure frequencies/periods/pulse widths/duty cycles.

Ease of use

The high-resolution 3.95-inch color TFT display shows relevant settings and parameters in both text and graphic formats, which give users full confidence in their settings, and let them focus on the task at hand. The front panel shortcut buttons and rotary knob make accesses to most frequently used functions and settings with minimum effort and time. The built-in 64-MByte non-volatile memory together with USB stick memory interface, provide unlimited space for user-defined waveform storage.

Software and solutions

The user-defined arbitrary waveforms generated by the free ArbExpress software can easily be loaded on the AFG1000 with a USB memory stick.

As a building block of Tektronix educational solution, the AFG1000 can be embedded into TekSmartLab and enable a cost efficient and effective way of teaching, learning, and lab management.

Specifications

All specifications are guaranteed unless noted otherwise. All specifications apply to all models unless noted otherwise.

| | - | 2 mV _{p-p} to 10 V _{p-p} |
| Accuracy | \pm (1% of setting +1 mV _{p-p}), (1 kHz sine v | Naveform () // offset) |
| Resolution | 1 mV_{p-p} , 1 mV _{rms} or 4 digits | |
| Units | V_{p-p}, V_{rms} | |
| Output impedance | ν _{p-p} , ν _{rms} 50 Ω (typical) | |
| Local impedance setting | Selectable: 50 Ω , 1 Ω to 10.000 k Ω , High Z (adjusts displayed amplitude according to selected load impedance) | |
| Isolation | No floating ground, signal ground connected to chassis ground | |
| Signal output protection | Short-circuit tolerance, main output automatically disabled when over current | |
| | | |

DC offset

| Range | \pm (5 V _{pk} – Amplitude _{p-p} /2), 50 Ω load |
|------------|--|
| | $\pm(10~V_{pk}-Amplitude_{p-p}/2),$ open circuit or high Z load |
| Accuracy | $\pm(1\% \text{ of setting } + 1 \text{ mV} + 0.5\% \text{ of amplitude }(V_{p\text{-}p}))$ |
| Resolution | 1 mV or 4 digits |

Modulation

Modulation, sweeping, and burst modes are only available for channel 1 on the AFG1022.

The AFG1062 supports equal strong channels with modulation, sweeping, and burst modes.

Amplitude modulation

| Carrier waveforms | Sine, square, ramp, arbitrary, except DC and noise |
|-------------------------------|--|
| Source | Internal / external |
| Internal modulating waveforms | Sine, square, ramp, noise, arbitrary |
| Internal AM frequency | 2 mHz to 20 kHz |
| Depth | 0.0% to 100.0% |
| | |

Frequency modulation

| | 4504000 | 4504000 |
|-------------------------------|--|---------|
| Frequency deviation | (limited by carrier waveform type) | |
| Internal modulating frequency | 2 mHz to 20 kHz | |
| Internal modulating waveforms | Sine, square, ramp, noise, arbitrary | |
| Source | Internal / external | |
| Carrier waveforms | Sine, square, ramp, arbitrary, except DC and noise | |
| | | |

| AFG1022 | AFG1062 |
|-------------------|-----------------|
| 2 mHz to 12.5 MHz | 2 mHz to 30 MHz |

Phase modulation

| Carrier waveforms | Sine, square, ramp, arbitrary, except DC and noise |
|-------------------------------|--|
| Source | Internal / external |
| Internal modulating waveforms | Sine, square, ramp, noise, arbitrary |
| Internal PM frequency | 2 mHz to 20 kHz |
| Phase Deviation | 0° to 180° |

Amplitude shift keying (AFG1062 only)

| Carrier waveforms | Sine, square, ramp, arbitrary, except DC and noise |
|-------------------------------|--|
| Source | Internal / external |
| Internal modulating waveforms | 50% duty cycle square |
| ASK rate | 2 mHz to 100 kHz |

Frequency shift keying

| Carrier waveforms | Sine, square, ramp, arbitrary, except DC and noise |
|-------------------|--|
| Source | Internal / external |

| Internal modulating waveforms | 50% duty cycle square |
|-------------------------------|-----------------------|
| FSK rate | 2 mHz to 100 kHz |

Phase shift keying (AFG1062 only)

| Carrier waveforms | Sine, square, ramp, arbitrary, except DC and noise |
|-------------------------------|--|
| Source | Internal / external |
| Internal modulating waveforms | 50% duty cycle square |
| PSK rate | 2 mHz to 100 kHz |

Pulse width modulation (AFG1062 only)

| Carrier waveforms | Pulse, ≤1 MHz |
|-------------------------------|--|
| Source | Internal / external |
| Internal modulating waveforms | Sine, square, ramp, arbitrary, except DC and noise |
| PWM frequency | 2 mHz to 20 kHz |
| Deviation | 0.0% to 50.0% of pulse period |

Sweeping

Modulation, sweeping, and burst modes are only available for channel 1 on the AFG1022.

The AFG1062 supports equal strong channels with modulation, sweeping, and burst modes.

Carrier waveforms

| Carrier waveforms | Sine, square, ramp, arbitrary (AFG1062 only) |
|------------------------------|--|
| Minimum start-stop frequency | 1 µHz |

Maximum start-stop frequency

| Sine | AFG1022 | AFG1062 |
|-----------------|-------------------------------|---------|
| | 25 MHz | 60 MHz |
| | | |
| Square | 12.5 MHz | 30 MHz |
| | | |
| Ramp | 1 MHz | 2 MHz |
| | | |
| Туре | Linear, logarithmic | |
| Direction | Up / down | |
| Sweep time | 1 ms to 500 s ± 0.1% | |
| Trigger sources | Internal, external, or manual | |
| Burst | | |

Modulation, sweeping, and burst modes are only available for channel 1 on the AFG1022.

The AFG1062 supports equal strong channels with modulation, sweeping, and burst modes.

| Waveforms | Sine, square, ramp, pulse, arbitrary except DC and noise |
|--|---|
| Types | AFG1022: count (1 to 50,000 cycles), infinite, gated AFG1062: count (1 to 1,000,000 cycles), infinite, gated |
| Start phase | -360° to +360° |
| Trigger sources | Internal, external, or manual |
| Internal trigger interval | (40 ns or (cycles x period) to 500 s) \pm 1% |
| Gate source | External trigger |
| Frequency counter | |
| Function | Frequency, period, positive pulse width, duty cycle |
| Frequency range | 100 mHz to 200 MHz |
| Frequency resolution | 6 digits |
